SP Umbrella Light Kit Includes:

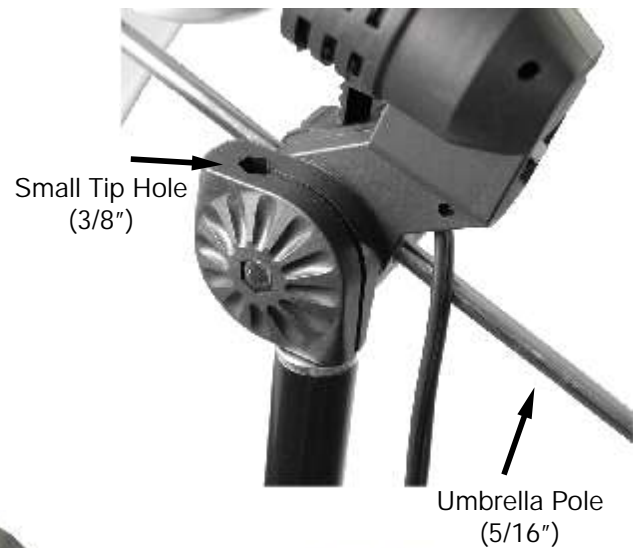

- A** Qty. 2 SP Photo Flood Florescent Bulbs (85 Watt)
- B** Qty. 2 Umbrella/Bulb Holders
- C** Qty. 2 SP806 Heavy Duty Light Stands
- D** Qty. 2 SP 2 Way Umbrella
- E** Qty. 1 Carry Case

Umbrella / Bulb Holder

WARNING: Do not handle bulb holder while connected to electricity. Make sure the A/C cord is not plugged into a wall socket.

1. The tip mount side has two sizes for mounting on standard 5/8" light stand tip or smaller tips of 3/8". Loosen the knob to swivel the tip mount to accommodate the proper size. The tip mount swivels to allow the bulb holder to rotate to the desired angle for use. Tighten the knob when the proper angle is achieved.
2. Next slide the umbrella pole through the center hole (5/16"). The pole will transverse through the hole and out the back side. Slide the pole to the desired depth for proper use. There is a tension bar inside that will hold the umbrella pole in place.
3. Screw the photo bulb into the A/C socket. Plug A/C cord into a standard 110 wall socket. *Ready to use.*
